Embrace Your Inner Artist

Floor covering brand Milliken launches Open Studio, a new carpet collection encouraging a hands-on, artistic approach to design. With eight colorways and four patterns inspired by several multimedia techniques such as plaster and printing, these innovative carpet designs add an expressive and modern touch to any interior space.

The four patterns include:

- Halftone
- Overlay
- Primer
- Canvas

“Open Studio’s neutral palette paves the way for easy pairing with more saturated tones,” the Milliken team says.

Milliken’s Open Studio carpet collection is a tribute to artistic experimentation and time-honored techniques, and its four patterns are inspired by screen printing techniques. With soft layers fading in and out, Halftone draws from delicate dot patterns to suggest imagery without fully defining it.

Meanwhile, translucent forms overlap in a rhythmic grid in Overlay, creating a pattern that is methodical yet handmade. Primer takes its cues from an artist’s canvas, with layers of soft neutrals combining in a subtle, tonal wash. Finally, Canvas consists of bold strokes juxtaposed with softer, organic shapes, evoking the spontaneity of mark-making.
